

WORLD ROWING STRATEGIC EVENTS ATTRIBUTION PROCESS

WIND ROSES EXAMPLE

Please provide the predicted wind information for the event in the form of wind roses, which clearly indicates wind speed, direction and frequency (percentage) for each direction **for the proposed month of the event.**

Wind roses are graphical charts that characterise the speed and direction of winds at a location. Presented in a circular format, the length of each "spoke" around the circle indicates the amount of time that the wind blows from a particular direction. Colours along the spokes indicate categories of wind speed.

Providing a screenshot or link to a trusted website is acceptable. **Please ensure that any webpage links are free to access.**
